

Supplementary Fig. 3. Correlation between BWT, US grade, CDS grade, and UCEIS at the most severely affected sites in the colon, excluding the rectum. (A) A strong correlation was found between BWT and UCEIS, (B) US grade and UCEIS, and (C) a moderate correlation was found between CDS grade and UCEIS. BWT, bowel wall thickness; US, ultrasonography; CDS, color Doppler signal; UCEIS, Ulcerative Colitis Endoscopic Index of Severity.
